EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

In the Specification, as amended on March 5, 2007, on line 5, after "(09/812,394)," insert "now US Patent No. 7,200,815,".

Terminal Disclaimer

3. The terminal disclaimer filed on March 14, 2008 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Patent 7,200,815 B2 and US Patent App. No. 09/812405 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

4. Claims 1-18 and 19-37 are allowed.

5. The following is an examiner's statement of reasons for allowance: in interpreting the claims in light of the Specification and applicants' arguments, the examiner finds the claimed invention patentably distinct from the prior art of record.

The prior art of record does not teach or suggest, either alone or in combination, the

Art Unit: 2144

invention as claimed. Shelton et al., US Pat. No. 5,951,643, teaches a system and method for managing information for web synchronization and tracking wherein a unique ID is assigned to a session and all activities by the consumer browser is recorded into the session (See Abstract, col. 2, lines 10-30 and col. 5, lines 1-10). However, Shelton does not explicitly teach a method and computer readable medium comprising detecting an event comprising changes in visual stimuli and assigning an identification (ID) to that particular event.

Further, Levine, US Pat. No. 6,385,590 B1, teaches a method and system for determining the effectiveness of a stimulus wherein storing and analyzing statistical information regarding user interaction with a visual stimulus (See Levine, Abstract, col. 3, line 66 - col. 4, line 52 and col. 5, line 21 - col. 6, line 40). However, Levine does not explicitly teach using the stored information, including at least one changed parameter of the visual stimuli caused by the event, for later reconstruction.

The examiner finds applicants arguments filed March 14, 2008 to be persuasive. See Remarks, page 7, line 15 - page 8, line 9 and Specification, page 14, line 1 - page 15, line 18 and page 21, lines 11-30 (page and line numbers refer to Specification as originally filed). See also arguments filed August 23, 2007, page 10, lines 1-10.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul H. Kang whose telephone number is (571) 272-3882. The examiner can normally be reached on IFP.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William Vaughn can be reached on (571) 272-3922. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
